

# Advanced Project Management

A SIMULATION POWERED LEARNING® WORKSHOP

Advanced Project Management SPL®

3 days - 21 PDUs

The Advanced Project Management Simulation Powered Learning® workshop is a 3 day class where students learn advanced project management concepts. If you're looking to take your project management skills beyond the fundamental level or if you're looking to develop your understanding and ability to apply the advanced project management tools and techniques required for PMP/CAPM® certification, this is the workshop for you. As projects become more complex and teams become more distributed and more diverse, a project manager needs more than a Gantt or Bar Chart to manage and lead their teams to a successful project completion.

In this three day workshop participants learn, through lecture and computer simulation, advanced project management concepts like individual and team motivation, leadership, earned value, procurement management, stakeholder relationship management, quality management and risk management.

In teams of four, participants actually plan and manage a complex simulated real-life project. They learn what it feels like as they make real decisions and get real feedback. The simulation powered learning is practical, engaging, intense and challenging. It's designed to give you the practice and confidence to actually apply your advanced skills in the workplace or prepare you with the knowledge and understanding to help you pass the PMP/CAPM Exam.

## TOPICS YOU WILL PRACTICE AND LEARN:

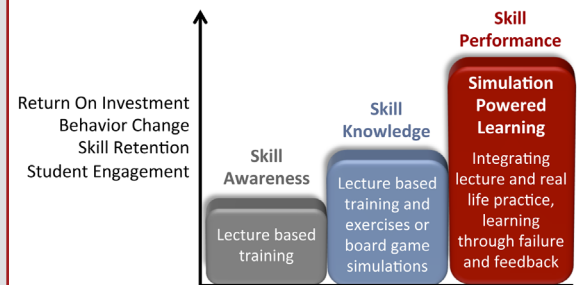

- Earned Value Management
- Risk Management
- Quality Management
- Schedule Management
- Cost Management
- Stakeholder Management
- Procurement Management
- Team building
- Leadership
- Resource Management
- Scope Management
- Monitoring and Control

## WHO SHOULD ATTEND

This workshop is for anyone who already understands and uses the basic tools and techniques of project management, and wants to extend their skills and expertise. The workshop is ideal for Project Management Professionals seeking to advance their skills and earn Professional Development Units.

## TURNING KNOWLEDGE INTO PERFORMANCE

Practice makes perfect. Our simulations put participants into a computer generated situation with real-life team members, stakeholders and challenges. Participants make real-life decisions and then see the results of those decisions – good and bad. They go back to work and are able to immediately apply what they have learned!

## TESTIMONIAL

"I sent approximately 100 of my Technical Escalation Engineers through the Fissure Advanced Project Management SPL Workshop. The goal was to take them out of their daily comfort zone with the in-depth simulation. The participant feedback was fantastic – the learning's were very eye opening and apply both today and in the long term of their careers."  
– Jim Chismar, Director of People Strategy Team Microsoft Product Support
