

# Agile Scrum Overview

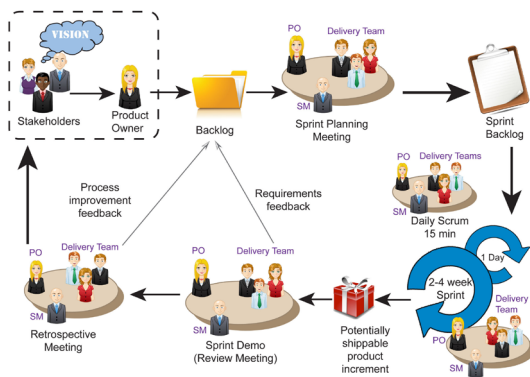

Agile Scrum Overview

4 hours - 4 PDUs

The Agile Scrum Overview is a 4 hour introduction to Agile and Scrum. It provides a high-level overview of Agile and Scrum including the Agile and Scrum team, tools, practices, risks, road-blocks, and the business value of implementing Agile. Agile techniques improve the quality of systems, the efficiency by which systems are developed, the frequency of delivering value to the customer and ultimately the customer's satisfaction.

Below is the Scrum based Agile project cadence. You will leave the workshop with an understanding of how a team-based Agile project works.

The Agile Scrum Overview begins by laying a foundation in best practice Scrum based Agile methodology using lecture, discussions, questions and exercises. This foundation provides the working knowledge and terminology necessary to understand a team-based Agile project. Students will understand the history of Agile, the importance of “being” as well as “doing” Agile, the vocabulary to discuss the benefits of Agile and how to get started using Agile.

## TOPICS YOU WILL PRACTICE AND LEARN:

- What’s all the Agile buzz?
- Essentials of Agile methodologies (Scrum, eXtreme Programming, etc) and Lean principles
- The Roles, Rituals and Results of Agile
- The Agile/Scrum Team
- The Agile Iterative and Incremental Delivery Framework
- Tools and practices
- Benefits of Agile
- Adoption and culture
- Risks and roadblocks
- Getting started

## WHO SHOULD ATTEND

Anyone who wants to know what it means to be Agile or anyone seeking to understand whether Agile would be a fit for their organization. This includes executives, managers, leads, product managers, project managers or anyone on a team.

## TURNING KNOWLEDGE INTO PERFORMANCE

Practice makes perfect. Our simulations put participants into a computer generated situation with real-life team members, stakeholders and challenges. Participants make real-life decisions and then see the results of those decisions – good and bad. They go back to work and are able to immediately apply what they have learned!

## TESTIMONIAL

“Good introduction to Agile and Scrum. Provided insight to what agile is. I will benefit from more exposure/instruction.”
