

Leading SAFe – Scaled Agile Framework® Training

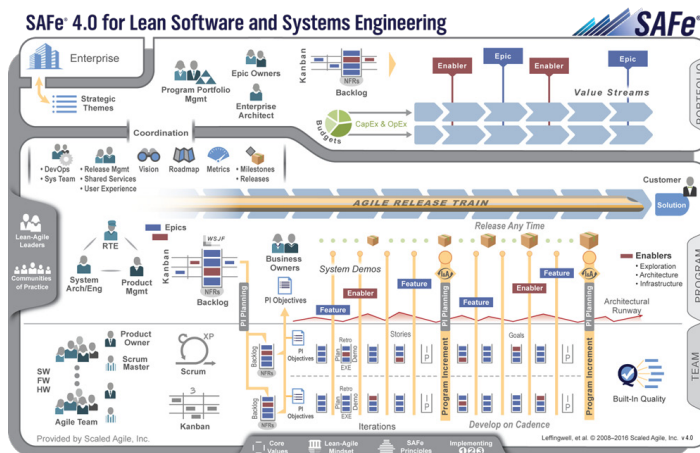

SAFe Agilist Certification

2 days- 14 PDUs

Many organizations are trying to increase their internal speed and flexibility by shedding bureaucratic governance models and structures. Agile principles have proven particularly effective for software development at a team level, but can they do the same at the organizational level? How do you scale agile principles and practices across the enterprise? Scaled Agile Framework® (SAFe®) answers these questions.

In this two-day class participants will learn the Lean-Agile principles and practices of the Scaled Agile Framework® (SAFe®). They will learn how to execute and release value through Agile Release Trains, how to build an Agile Portfolio, and how to lead a Lean-Agile enterprise. Participants will leave with an understanding of the Lean-Agile mindset and how to apply the principles and practices of SAFe to support Agile teams, programs, program portfolio management and how to coordinate large Value Streams.

If you are looking to harness the power of agile across your entire organization, this course will provide you with the thinking, mindset, framework and the tools you will need. Understanding the principles of lean software development and product development flow in the context of the SAFe framework will equip you to lead agile transformation in your organization.

Attending the class satisfies the requirement for the SAFe® Agilist (SA) certification and prepares you to take the certification exam. The cost of the exam is included in the course fee.

TOPICS YOU WILL PRACTICE AND LEARN

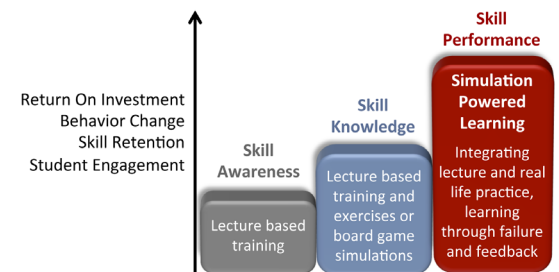

- Introducing the Scaled Agile Framework
- Embracing Lean and Agile Values
- Understanding SAFe Principles
- Implementing the Agile Release Train
- Experiencing Program Increment (PI) Planning
- Executing and Releasing Value
- Building an Agile Portfolio
- Coordinating Large Value Streams
- Leading the Lean-Agile Enterprise

WHO SHOULD ATTEND

Implementing Agile at the enterprise level requires the coordination and effort of everyone in the organization. This course is beneficial to executives, managers, agile leaders, change agents and agile team members. Typical participants include: Scrum Masters, Product Owners, Agile Team Members, Project Managers, Program Managers, Product Managers, Portfolio Managers, Agile Coaches, Consultants, Business Managers, Directors, C- Level Executives, and Stakeholders.

TURNING KNOWLEDGE INTO PERFORMANCE

Practice makes perfect. Our simulations put participants into a computer generated situation with real-life team members, stakeholders and challenges. Participants make real-life decisions and then see the results of those decisions – good and bad. They go back to work and are able to immediately apply what they have learned!

“This was an ingenious course and a fantastic experience for my team! I would never have imagined such a clever way of seeing the immediate impact of changes made throughout a project. Brilliant, effective and fun!” – J. Anderson, Ciber, Inc.
